**near-capacity wireless multimedia system design: error ...** - near-capacity wireless multimedia system design: error-resilient source-compression, multi-functional mimos and efficient streaming abstract: most multimedia source signals are capable of tolerating lossy, rather than lossless, delivery to **near-capacity network coding for cooperative multi-user ...** - that a realistic near-capacity channel coding scheme is designed for the sake of supporting network-coding aided multi-user communications. we consider the effects of both the shadow fading and of the small-scale rayleigh fading in our channel model. the performance of the proposed system obtained by simulations is compared to that estimated by prbm. the specific design guidelines presented ... **1338 ieee transactions on wireless communications, vol. 7 ...** - irregular variable length codes for near-capacity joint source and channel coding r. g. maunder, j. wang, s. x. ng, l.-l. yang, and l. hanzo abstract—in this paper we propose a novel irregular variable length coding (irvlc) scheme for near-capacity joint source and channel coding. we employ a number of component variable length coding (vlc) codebooks having different coding rates for ... **near-capacity adaptive analog fountain codes for wireless ...** - near-capacity adaptive analog fountain codes for wireless channels mahyar shirvanimoghaddam, student member, ieee, yonghui li, senior member, ieee, and branka vucetic, fellow, ieee, abstract—in this paper, we propose a capacity-approaching analog fountain code (afc) for wireless channels. in afc, the number of generated coded symbols is potentially limitless. in contrast to the conventional ... **construction of near-capacity protograph ldpc code ...** - less than capacity. with variable power and order  $\log_b$  steps, we bring the achievable rate up near capacity  $c$ , albeit with a gap from capacity of order  $1 = p \log_b$ . with the variant in which the power is leveled for  $\beta = 1$  near 1, the gap from capacity is reduced to order  $1 = \log_b$ , to within a  $\log \log$  factor, and, moreover, the section mistake rate is less than a constant times  $1 = \log_b$ , except in an ... **shame and philosophy an investigation in the philosophy of ...** - the communications industry to achieve near-capacity on a single-antenna gaussian or fading channel with low complexity. we show how these iterative techniques can also be used to achieve near-capacity on a multiple-antenna system where the receiver knows the channel. combining iterative processing with multiple-antenna channels is particularly challenging because the channel capacities can be ...
